Allowable Subject Matter

1. Claims 1-12 are allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: Although the prior art teaches digital communication systems wherein the architecture of a transmitter device that includes video/audio encoders coupled to corresponding buffer/memory and packet circuits which in turn is indirectly coupled to a multiplex controller and multiplexer, compressed data is stored in buffer/memory, and the multiplex controller reads video/audio data stored in buffer/memories and writes packet data of read video/audio and associated control data to memory, a plurality of data transmission devices indirectly coupled together, such as, a first/second terminal devices which includes a first/second compressors, audio signal detectors associated in a wireless environment and audio level meters, they fail to teach or suggest the audio signal detector receiving both inputted audio data and an audio input switch signal, audio detector measures audio levels of the inputted audio signals and generates a data write control signal for controlling the video data encoder and audio data encoder, and generating an audio detection signal for controlling the multiplexing controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prenell P. Jones whose telephone number is 571-272-3180. The examiner can normally be reached on 9:00-5:30.
